

SOLAR SYSTEM

Sun

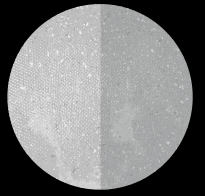

Hello everyone I am Sun.

- I am biggest and hottest star.
- I am **yellow** in color.
- I am a big ball of hot gas.
- I am in the center of our solar system.
- All the planets goes around me.
- I gives light and heat.
- I helps plants grow. 🌱
- I looks small, but i am really huge!
- Without me, there would be no life on Earth.
- I rises in the morning and sets in the evening.

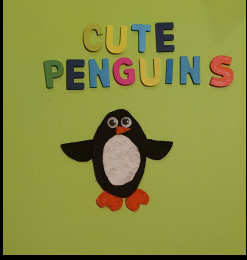

Mercury

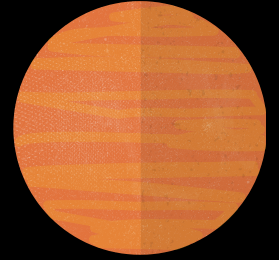

Hello everyone I am Mercury.

- I am a planet
- I am closest planet to the sun.
- I am the smallest planet.
- I have no moon.
- I am very hot during the day and freezing at night.
- I looks like a grey, rocky ball.
- A year on me is just 88 Earth days long.
- I have craters like the Moon.
- There's no air to breathe on me.

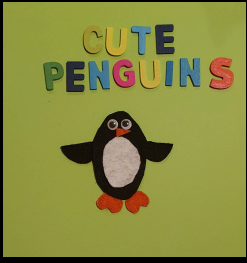

Venus

Hello everyone I am Venus.

- I am 2nd planet from the sun.
- I am hottest planet.
- I looks very bright in the sky.
- I am the first to appear in the sky in the evening and last to disappear in the morning as a star.
- This is why I called the morning star or evening star.
- I have thick clouds of gas.
- I spins the opposite way from most planets!
- I am about the same size as Earth.
- People call me Earth's "twin."
- I have volcanoes and rocky mountains.

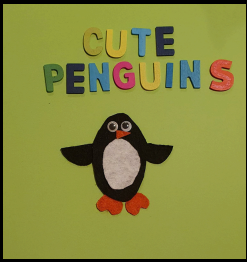

Earth

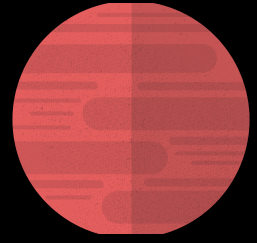

Hello everyone I am Earth

- I am 3rd planet from the sun.
- I am also known as blue planet.
- I am the only planet where life exists.
- I am 70 % covered with water.
- I have one moon.
- It have air that we can breathe.
- I spins once every 24 hours.
- A year on me is 365 days.
- I have land, water, air, and weather.

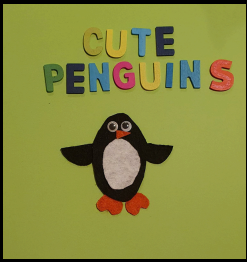

Mars

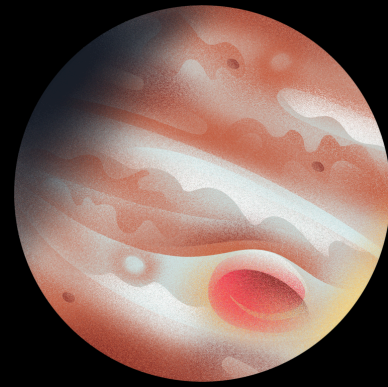

Hello everyone I am Mars.

- I am 4th planet from the sun.
- I am also known as red planet.
- I have two small moons.
- I have the tallest volcano in the solar system (Olympus Mons).
- My surface is dusty and rocky.
- I have big dust storms.
- Scientists are exploring me with robots.

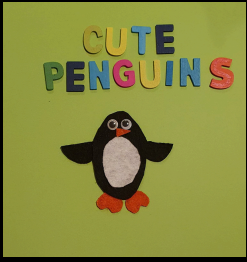

Jupiter

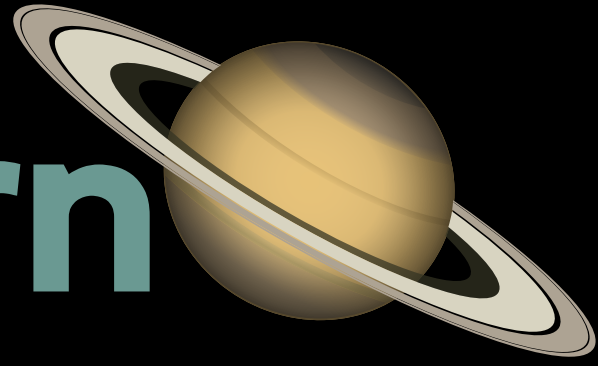

Hello everyone I am Jupiter.

- I am 5th planet from the sun.
- I am giant and stormy planet.
- I am biggest among all planets.
- I have 95 moons.
- I am mostly made of gas.
- I have a big red spot — a giant storm!
- I spins very fast — a day is just 10 hours.
- I have faint rings.
- I am super windy and stormy.

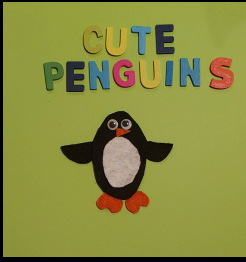

Saturn

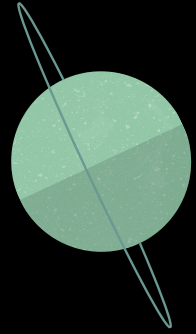

Hello everyone I am Saturn.

- I am 6th planet from the sun.
- I am famous for my big and bright rings.
- I am mostly made of gas.
- I am the second largest planet.
- I have 274 moons!
- My rings are made of ice and rock.
- I am very light — I could float in water!
- I am very cold and windy.

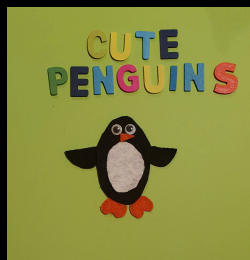

Uranus

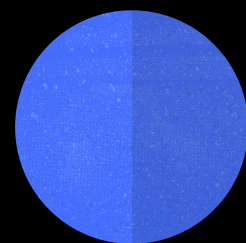

Hello everyone I am Uranus.

- I am 7th planet from the sun.
- I am super cold , known as a coldest planet.
- I am also known as Ice-giant.
- I spins on my side like a rolling ball.
- I am a blue-green color.
- I am made of gas and ice.
- I have faint rings.
- I have 28 moons.
- A year on me is 84 Earth years long.

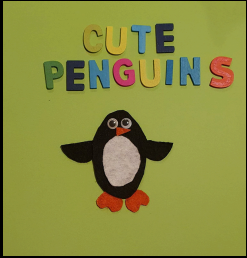

Neptune

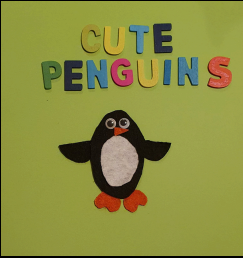

Hello everyone I am Neptune.

- I am 8th planet from the sun.
- I am farthest from the sun.
- I have 16 known moons.
- I am dark blue windy planet.
- I have the strongest winds in the solar system.
- I am made of gas and ice.
- I have a big dark spot - a storm like Jupiter's.
- A year on me is 165 Earth years long!
